

# COMPANY PROFILE

As specialists in the Waste Management Industry, Ace Waste commits to best practice to ensure cost-effective, safe and environmentally sound management of waste processing and disposal of contaminated and regulated wastes.

## COMPANY PROFILE

With the two largest environmentally friendly high temperature incineration facilities in Australia, Ace Waste is capable of processing between 35-50 tonne of waste per day.

### The safe and responsible alternative

With over 30 years experience, Ace Waste offers you the right advice to ensure that your waste disposal is according to government compliance standards.

### Engineered in Australia to strict specifications

Ace Waste's licensed incineration facilities in Queensland and Victoria provide the highest standard of environmental safety performance in Australia.

### Waste to energy

Ace Waste leads the way in environmentally sustainable waste management, and our unique combustion process transforms waste into renewable energy.

### Blended waste streams

Our extensive knowledge in different waste enables us to blend waste streams to achieve optimal combustion efficiency and complete destruction of waste.

### Transparent and trackable

Experience complete peace of mind knowing that your waste will be disposed of in an ecologically responsible way. Our patented Ace Waste Live™ Tracking System ensures that your waste is fully traceable, with real-time tracking.

Ace Waste is a reliable and quality waste management services provider. We are fully licensed by the Department of Environment and Science (DES), Victorian Environmental Protection Agency (EPA) & Department of Agriculture and Water Resources (DAWR) to carry out waste collection, processing and disposal services for clinical and related, cytotoxic, pharmaceutical, biosecurity (quarantine), regulated and prescribed industrial wastes (PIW) including all solvent liquids and lab wastes in Queensland and Victoria. We are also a member of the Waste Management Association of Australia (WMAA) and comply with relevant Code of Practice for the Management of Clinical and Related Wastes.

Manage your waste and decrease your environmental impact, with our range of cradle-to-grave waste solutions including:

- Clinical and related waste.
- Pharmaceutical waste.
- Biosecurity waste.
- Security waste.
- Regulated and prescribed industrial waste.
- Commercial and industrial waste.
- Total waste management solutions.
- Waste auditing.
- Ace Waste Live™

Ace Waste's facilities are the only waste disposal facilities that are continuously (real time) monitored 24 hours per day. With an impeccable safety and compliance record, our Queensland facility has over 90,000 hours of incident free data.

- Ace Waste has the two largest environmentally friendly high temperature treatment facilities in Australia processing between 35-50 tonne of material per day.
- Remove the burden of compliance with our cradle to grave solutions that manage multiple hazardous and problematic waste.
- The use of Incineration waste disposal is proven to be more environmentally sound and produces 24 times less greenhouse gas emissions than other methods of waste disposal.
- Ace Waste understands the various requirements of individual businesses, health providers and industrial entities, which is why we offer total waste management solutions for the complete single service provider management of all your waste streams.
