

COMMERCIAL & INDUSTRIAL WASTE

Ace Waste provides the timely and reliable disposal of commercial and industrial waste, with a focus on recycling initiatives.

COMMERCIAL & INDUSTRIAL WASTE

Complete management of your waste

When we say that your waste will be completely managed, we guarantee it. We are the trusted partner of countless organisations who require efficient and credible management of various waste streams.

Reduce and recycle

Ace Waste focuses on providing specialised services for the collection and disposal of commercial waste. Our recycling initiatives include fluorescent tube and oil filter recycling.

Site Evaluation

Our fully trained personnel can audit your site to develop a comprehensive waste strategy. Each of your waste streams will be accounted for in your waste management strategy so you won't need to deal with multiple waste companies.

Commercial and industrial waste is waste that arises from activities in commercial and industrial sites, including factories, institutions, offices and retail stores. Ace Waste has extensive experience in managing the safe and compliant disposal of commercial and industrial wastes.

A photograph of an industrial facility, likely a waste treatment plant. On the left, a tall, white, cylindrical chimney or stack rises into a blue sky with light clouds. Below it, there are green metal structures, including a large circular platform with a metal mesh floor. To the right, there are large green industrial machines with pipes and conveyor belts. The overall scene is industrial and clean.

Commercial and industrial waste includes the following:

- General Waste and recycling.
- Organic waste, e.g. food waste.
- Paper & cardboard.
- Plastics.
- Metals.
- C&D (Construction and Demolition).
- Hazardous materials
- Glass.
- Recyclables.
- E-waste.
- Oil filter recycling.
- Fluorescent lamps.

Ace Waste provides a reliable solution for all commercial and industrial wastes.

- As part of our commitment to environmental sustainability, we recycle oil filters. Our Kruncher machine can process up to 400kg of oil filters per hour, while the remaining materials, extracted oil and metal are recycled.
- Fluorescent tubes and fluorescent tube waste are problematic. Ace Waste streamlines the disposal process by supplying a custom box for the safe collection and transportation of this waste. Fluorescent tubes and tube waste are recycled at our Willawong facility.
- Your concerns regarding compliance are alleviated with Ace Waste's solutions that manage waste streams. Ace Waste is fully licensed by the Department of Environment & Science (DES), Victorian Environmental Protection Agency (EPA) & Department of Agriculture and Water Resources (DAWR) to carry out waste collection, transportation, processing and disposal services for the growing variety of waste streams.
